

# NINGALOO

## Reflections on the Reef

by Leith Holtzman

This is a unique, informative and interactive book that displays the wonders of Australia's World Heritage listed Ningaloo Reef and Western Australia's coastal marine life.

The exquisite photos and well-sourced facts about Ningaloo Reef and its magnificent marine life are further brought to life with anecdotes from the author's personal experience from his many years photographing on the Reef.

*A brilliant blend of advocacy and adventure*

The text of the book and the superb photographs are supplemented by 18 of the author's videos of whale sharks and other marine life—all accessible directly from the book via QR codes or web links—making a virtual visit to the Reef possible!

A one-of-a-kind book, this state-of-the-art publication is the first on the Ningaloo Reef since the 1990's and pays homage to this wonderful 2011 World Heritage listed site.
